PROFILE

Computer Engineering student with a focus on Flutter mobile development. Experienced in building real world apps using Flutter, AppSheet, and REST APIs. Passionate about creating intuitive user experiences and continually expanding my tech stack.

WORK EXPERIENCE

JAN 2024 – PRESENT

MOBILE DEVELOPER, FREELANCER

Flutter Experiences

- **FEB 2025 – PRESENT**– Clinic management application.
- **NOV - DEC 2024** – Inventory management application for Inverters company.

AppSheet Experience:

- **JUL – AUG 2024** – Employees management application for an HR department
- **JUN 2024** – Clinic management application for an eye doctor.
- **APR 2024** – Clients management application for suit store.
- **JAN - FEB 2024** – Clinic management application for a surgeon.

JUL 2022 – FEB 2024

IT, ABDELDAYEM GROUP (Part time)

Part time IT responsible for:

- Building and maintaining the group's network infrastructure.
- Automating work using google apps script.
- Managing all hardware and software technicalities.

INTERNSHIPS

APRIL - OCT 2024

MINISTRY OF COMMUNICATIONS AND INFORMATION TECHNOLOGY (DEPI), MOBILE APP DEVELOPMENT

Throughout this course, I gained hands-on experience with:

- The basics of Android native development
- Core concepts of Flutter for cross-platform apps
- Business English Course

FEB 2023

SIEMENS ENERGY, LOGIC DESIGN

Worked on designing and implementing various digital circuits projects:

- Water pumping system
- Traffic light system
- Numeric counters.

AUG 2022

ECD (MH GROUP), ELECTRICAL FIELD ENGINEERING

Implemented electrical infrastructure for NBE Elshrouk main branch.

2020 – Present

STUDENT ACTIVITIES

- **RAS AMBASSADOR**, IEEE
- **FLUTTER DEVELOPER**, ZIGZAG
- **HR**, ZIGZAG
- **FORMULA ELECTRICAL ENGINEER**, ZUFS
- **OPERATION**, TEDX ZU

2010-2020

VOLUNTEER, LIFE MAKERS, RESALA

Participated in every charity work in both organizations and was leader in:

- Fundraising team
- Karakeeb event (+1000 attendees)
- Searching team

PROJECTS

NO CODE AI PLATFORM (Flutter, REST API, JWT) – (Oct–In progress) [GitHub](#)

- As the Graduation project me and my team are collaborating to build a drag and drop windows application using flutter framework. This project allows users to create Ai models, train them on their data and deploy their models without the need for learning python.
- In this project I implemented Rest APIs, Drag and drop user interface and JWT authentication process

HARDWARE CALCULATOR – (Feb – May 2024) [GitHub](#)

- Collaborated with a team to build a fully functional hardware calculator using only logic gates (no controllers or code). The calculator performs addition, subtraction, multiplication, and division for numbers up to 15. It also features memory operations (M+, M-, M clear).

DUAL-MODE ROBOTIC CAR (RC & LINE FOLLOWER) – (Oct – Dec 2023) [GitHub](#)

- Worked with a team to Design and develop a robotic car capable of operating in two modes: RC mode (manual control) and Line Follower mode (using infrared sensors).

MEMORY CARD GAME (JAVA, JAVAFX) – (Mar – Jun 2023) [GitHub](#)

- As part of a team, developed a memory card game using Java and JavaFX. The project applied key OOP principles, ensuring a maintainable codebase. Built an interactive UI using JavaFX.

EDUCATION

2020 – JUN 2025

BACHELOR COMPUTER ENGINEERING, ZAGAZIG UNIVERSITY

CERTIFICATES

- **Mobile App Development** by Ministry of Communications and Information Technology (Oct. 2024)
- **Flutter Bloc and MVVM Pattern** by Tharwat Samy (Sep. 2024)
- **Flutter & Dart Development Course** by Tharwat Samy (Aug. 2024)
- **Technical Support Fundamentals** (Aug. 2023)
- **McKinsey Forward Program** (Jul. 2024)
- **Microsoft Office Specialist** Code: rLcW-uGFR Nov. 2016

TECHENICAL SKILLS

- **Languages:** Dart, Java, JavaScript, C++
- **Frameworks & Tools:** Flutter, AppSheet, Android Native Basics, Google Apps Script
- **Concepts:** REST APIs, JWT, MVVM, Bloc
